

Simple, intuitive, actionable: The myPBM experience

Better efficiencies
and better data for
better decision making

Ready to streamline all the aspects of your pharmacy care services?

myPBM is our modular, cloud-based platform, powered by Microsoft Azure, that drives efficiency, optimizes data, and so much more. The platform is designed with you in mind, ensuring better workflows and a seamless experience — saving time and resources.

BETTER EFFICIENCIES

50%

decrease in turnaround
time for client plan
design and benefits¹

Boost speed, accuracy and efficiency with easier access to information that matters

Managing plan requirements doesn't have to be complicated. **myPBM** simplifies and personalizes end-to-end PBM services, from plan setup through financial reporting.

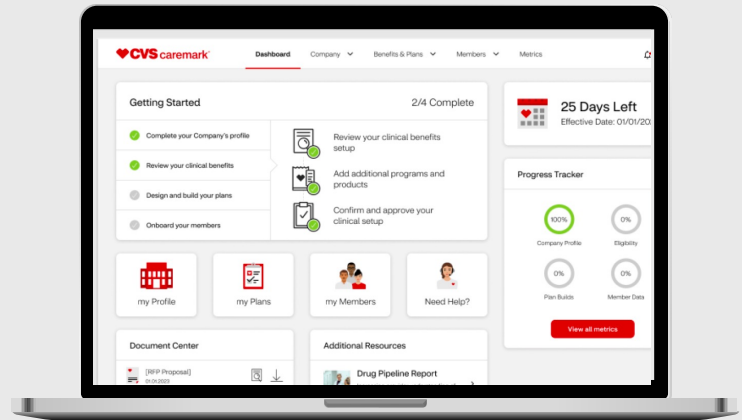

Clients enjoy a user-friendly interface and self-service functionalities. So, you can set up and meet plan needs quickly and accurately.

BETTER DATA

Harness plan data in an all-in-one solution

myPBM acts as a single source of truth across all CVS Caremark programs, services, and products. It's all right there in our client portal, at your fingertips. By having central data hubs, every team has access to information and insights you can trust.

The key is to connect these insights to better understand key trends, answer operational questions, and optimize plan performance. Empower your teams to pull data from all sources to create custom reports and access real-time updates the way you want.

BETTER DECISION MAKING

Transform business strategy with a digital PBM platform built for what's next

Our clients can stay ahead of the curve with **myPBM**. It isn't just an app; it's your strategic partner for delivering healthier benefits. And it's ready to grow along with your business. As we streamline, simplify, and automate key plan management processes, teams have more room to focus on optimizing strategy and best meeting member needs.

Analyze robust data

to adapt and optimize plan performance

Test scenarios

to identify potential gaps and opportunities

Smart recommendations

and modeling for improved performance
